SUMMARY

Final-year B.Tech AI & Data Science student seeking a Junior DevOps Engineer role. Hands-on with building automated CI/CD pipelines using Jenkins, GitHub Webhooks, SonarQube and Docker, provisioning AWS infrastructure (VPC, EC2, Security Groups) as code with Terraform, and deploying applications on AWS. Also experienced in React frontends and n8n/OpenAI workflow automation.

TECHNICAL SKILLS

CI/CD & Automation	Jenkins, GitHub Actions, GitHub Webhooks, SonarQube, n8n, Workflow Automation
Containers & Cloud	Docker, Docker Hub, AWS, Terraform (IaC)
Operating System	Linux
Scripting & Configuration	Python, Bash, YAML
Networking & Remote Access	SSH, HTTP/HTTPS, DNS, TCP/IP
Frontend	HTML, CSS, JavaScript
Databases & APIs	MongoDB, SQL, REST APIs, OpenAI API, Webhooks
Tools	Git, GitHub, VS Code, Postman

PROJECTS

Automated CI/CD Pipeline — Jenkins, Docker & AWS EC2 *Jenkins | GitHub Webhooks | SonarQube | Docker Hub | Linux*

GitHub: github.com/ranjith200603/Automated-CI-CD-Pipeline

- Built an automated CI/CD pipeline using Jenkins to build, test and deploy a Node.js application, triggered by GitHub Webhooks on every code push.
- Integrated SonarQube static code analysis and Quality Gate checks to evaluate code quality.
- Containerized the application with Docker and published versioned images to Docker Hub.
- Automated deployment on AWS EC2 with container management and health checks; set up Jenkins email notifications for pipeline success and failure.

AWS Infrastructure Provisioning & Automation using Terraform *Terraform | AWS EC2 | VPC | Security Groups | Ubuntu Linux*

GitHub: github.com/ranjith200603/aws-terraform-infrastructure

- Provisioned AWS cloud infrastructure using Terraform Infrastructure as Code (IaC).
- Created and configured a custom VPC, public subnet and Internet Gateway, with route tables and associations for public network connectivity.
- Implemented Security Groups to manage inbound and outbound traffic.
- Automated EC2 instance provisioning using reusable Terraform configurations, variables and outputs.
- Managed the infrastructure lifecycle using Terraform init, plan, apply and destroy commands.

TastyBite — Full-Stack Food Delivery App (AI-Assisted Development) *React | Node.js | Express.js | MongoDB*

GitHub: github.com/ranjith200603/TastyBite | **Live:** tastybite-b4bb.onrender.com

- Developed a full-stack app with food browsing, cart, authentication and orders; REST APIs in Node.js and Express.js with MongoDB storage.
- Built responsive interfaces with React, Vite and Tailwind CSS; deployed for real-world accessibility and testing.

EDUCATION

B.Tech — Artificial Intelligence & Data Science **2023 – 2027**

Tagore Institute of Engineering and Technology, Salem (Final Year)

CERTIFICATIONS & INTERNSHIP

- Web Development Internship — Code Builders (15 days)
- Frontend Technologies Certificate — De Mentee (Grow With Your Mentor)
- Big Data & Deep Learning Foundations — Digilabs

ADDITIONAL

Languages: English, Tamil
