PROJECTS

Automated CI/CD Pipeline with Jenkins, Docker & AWS EC2

AWS EC2 | Jenkins | GitHub Webhooks | Docker | Docker Hub | SonarQube | Node.js | Linux

- Built an automated CI/CD pipeline using Jenkins to build, test and deploy a Node.js application.
- Configured GitHub Webhooks to trigger Jenkins builds automatically on code pushes.
- Integrated SonarQube static code analysis and Quality Gate checks to evaluate code quality.
- Containerized the application with Docker and published versioned images to Docker Hub.
- Automated deployment on AWS EC2 with Docker container management and application health checks.
- Configured Jenkins email notifications for pipeline success and failure.

URBAN — Men's Wear E-Commerce Frontend (AWS Deployment)

React | TypeScript | Vite | CSS | AWS S3 | AWS EC2

- Built a responsive e-commerce frontend with product categories, search, cart, wishlist and user login.
- Developed an admin panel for managing the store.
- Deployed the application on AWS using S3 and EC2.

TastyBite — Full-Stack Food Delivery Application

React | Vite | Tailwind CSS | Node.js | Express.js | MongoDB

- Developed a full-stack food delivery application with food browsing, cart, authentication and order functionality.
- Built responsive user interfaces using React, Vite and Tailwind CSS, with backend REST APIs in Node.js and Express.js.
- Integrated MongoDB for data storage; implemented login state and cart using frontend state and browser storage.
- Deployed the application for real-world accessibility and testing.

ResumeIQ — AI Resume Analyzer

Python | AI | REST API | Frontend + Backend | PDF Reports

- Built an AI-powered application to analyze resume content and provide an evaluation score.
- Developed a frontend connected to a Python backend for resume processing and analysis.
- Provides improvement suggestions and supports downloadable PDF analysis reports.
